

Bright Minds, Local Roots

One Act. One School.
A Lifetime of Possibility.

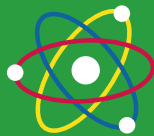

Support a Science Adventure – £500 per school

What if you could change a child's future
– for the price of a team lunch?

Right now, too many young people are missing out on science – not because they lack interest, but because they've never had the opportunity to see what's possible. For many, particularly in underserved communities, the world of STEM can feel distant or out of reach.

Bright Minds, Local Roots is your opportunity to change that.

CAMBRIDGE
SCIENCE
CENTRE

What your support delivers

With a one-off gift of £500, you can give a full class (up to 35 pupils) from a local school the chance to visit Cambridge Science Centre. Your support covers everything:

- Transport to and from the Centre
- Full access to our interactive STEM exhibits
- A hands-on, curriculum-linked workshop led by experienced science communicators
- A memorable, confidence-building experience in a welcoming, inclusive space

For many schools, it's not a lack of interest that holds them back – it's the cost of getting through the door. Rising transport costs are making educational visits harder to access, especially for schools in underserved areas. That's where your support makes a tangible difference.

Why it matters – and why now

Research shows that children begin forming ideas about which subjects are “for them” in the final years of primary school. Without early, positive exposure to STEM, many opt out before they’ve had a chance to opt in – especially girls and children from disadvantaged backgrounds.

That’s why timely intervention is so important. These visits ignite curiosity, break down barriers, and show every child that a future in science is within reach.

One school at a time – with a wider ambition

This campaign is focused on creating meaningful experiences for one school at a time – but it’s also part of a broader effort to strengthen connections between schools, families, and science.

Each visit opens the door to deeper, longer-term engagement with Cambridge Science Centre – from return visits and outreach to collaborative programming that continues to grow curiosity and confidence.

Whether you support one school or several, you’re not just funding a visit. You’re helping to build a more inclusive and inspiring future for STEM in your community.

Ready to make a difference?

Support one school – or more. Every £500 gift brings science to life for a class of young learners and helps shape a more equitable future.

One decision. Lasting impact.

Let’s open the door to science – together.
Join us. Bright minds are waiting.
